Plexiglass, polystyrene, PVC, polypropylene, PET: these are raw materials used in our every day production. We keep them in stock in considerable quantities and we process them into pockets, menu holders, label holders, foils, displays, exactly as per our client's requirements. We screen and digitally print them, we bend them, stitch, glue, punch, mill and deliver them always in time.

You are welcome to see how your project is coming into reality from a simple piece of plastic.
