We do not notice their importance unless they are missing. Either it is about shopping carts, professional cutters or surveillance mirrors , we have here a range of products of maximum utility. More than that, this chapter starts with a selection of shopping trolleys, a first time for our catalogue.

The shopping trolleys are a „must have” ingredient of the modern trade. Being most of the time exposed to outdoor conditions, they should be able to successfully face all season weather, from the summer heats to the winter deep freezing temperatures. Geck trolleys are produced in Ger-

many, following the highest quality standards, according to DIN EN 1929. The prices are available on request so please do not hesitate to send us an email at info@artmatch.net.

Standard shopping trolleys, recommended for discounts or supermarkets, available in four volumes. Wheel diameter: 125 mm.

Volume: 132 liters
Dimensions: 988x600x1014 mm (Lxlxh)
